
DELGRIND 620

Product Description

DELGRIND 620 is a form grinding oil specially developed for modern grinding machines, where the oil is required to meet very stringent standards.

The use of **DELGRIND 620** ensures:

- Removal of large amounts of material from the workpiece in a single grinding operation
- Prevention of workpiece burning
- Improvement of the surface finish
- Rapid removal of grinding residues
- High filtration capability
- Protection of the machine against corrosion

Applications:

- Drill grinding
- Milling
- Threading
- Gears, etc.
- Machining of very hard metals such as INCONEL
- DELGRIND 620 is intended for machining particularly hard metals

Typical Properties

	DELGRIND 620
Viscosity cSt @ 40° C ASTM D 445	25
Flash Point, °C, ASTM D 92	180
Appearance	Light, transparent
